

Apdex - Application Performance Index
Response time.

- ① Satisfied - responseTime $\leq T$ (Threshold)
- ② Tolerating - responseTime $> T$ but $\leq 4T$
- ③ Frustrated. - responseTime $> 4T$

Apdex $\rightarrow$ $\frac{0 - 1}{\text{Worst} \quad \text{Best}} \rightarrow \left(\frac{\text{Satisfied} + \text{Tolerating}}{2} \right) / \text{TotalRequest}$

0.0 - 0.49 $\rightarrow$ Unacceptable

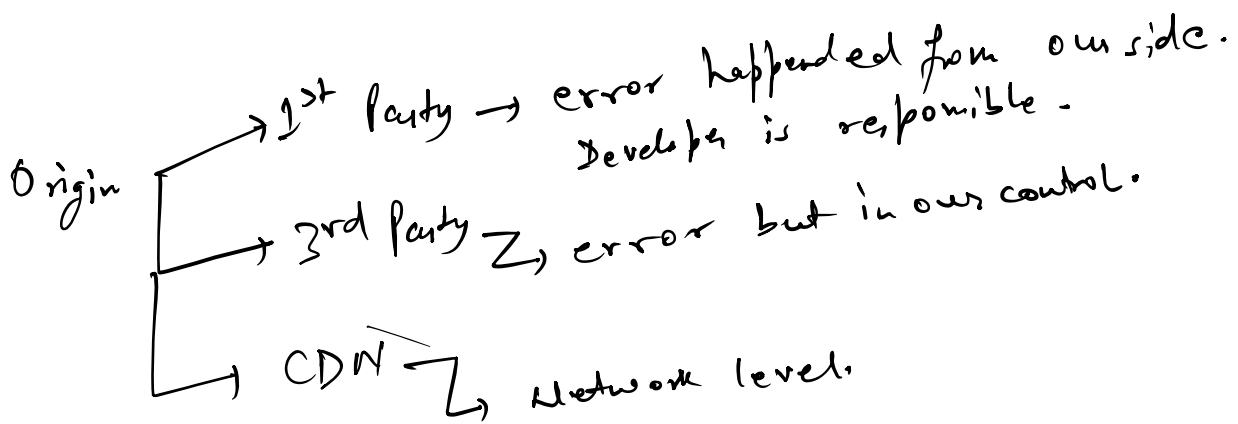

0.50 - 0.69 $\rightarrow$ Poor

0.70 - 0.84 $\rightarrow$ Fair

0.85 - 0.93 $\rightarrow$ Good

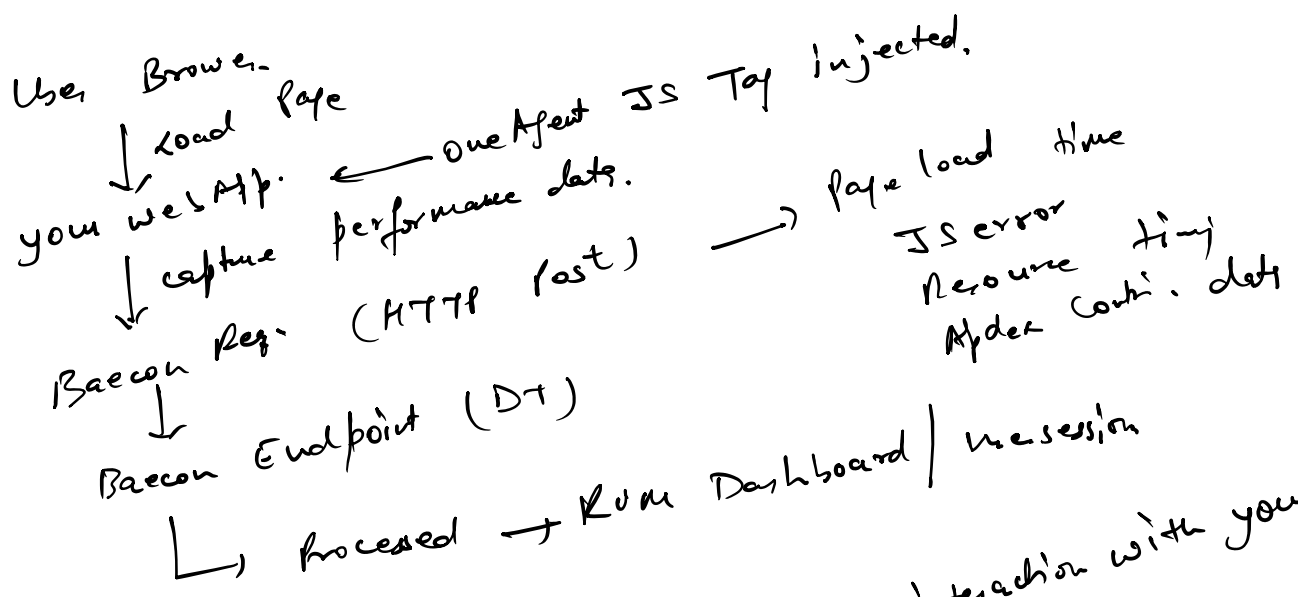

0.94 - 1.0 $\rightarrow$ Excellent

Default Threshold (T): 200ms for most transaction type.

Bounce:- Occur when a user visit a single page & leave without any further interaction - no clicks, no navigation, no additional req.

$$\text{Bounce \%} \rightarrow \left(\frac{\text{Bounced Session}}{\text{Total Session}} \times 100 \right)$$

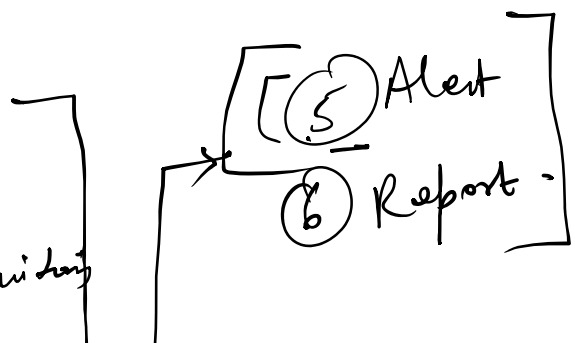

Synthetic Monitoring:- Simulate user interaction with your app.

- ① Browser Monitor - using scripted test run.
- ② HTTP Monitor - Simulate real user full clickpath journey.
- ③ Browser clickpath - Multi step user journey scripted.

Tomorrow:-

- ① Browser clickpath.
- ② Advance Synthetic Monitoring

- ② Advance Synthetic Monitoring
③ Dashboard.
④ Anomaly detection
